

EMMANUEL IHEJAMAIZU

Applied AI, Data & Software Professional

Waterloo, ON | emmanuelciheji@gmail.com | [linkedin.com/in/emmanuelihejamaizu](https://www.linkedin.com/in/emmanuelihejamaizu) | github.com/chooksemmanuel

PROFESSIONAL SUMMARY

Applied Artificial Intelligence and Machine Learning graduate certificate student with a Computer Science foundation and hands-on experience building Python-based AI/NLP prototypes, Streamlit demos, structured JSON parsers, FastAPI/React workflows, data-driven analyses, and technical documentation. Brings practical operations leadership from a logistics business serving 350+ customers, plus cybersecurity-aware thinking around risk, trust, and responsible technology use.

CORE STRENGTHS

Applied AI & Data Python, pandas, NumPy, scikit-learn, model evaluation, data preprocessing, visualization	AI / NLP Systems Rule-based parsing, fuzzy matching, structured JSON, confidence scoring, clarification logic, prompt design	Software Development Streamlit, FastAPI, React, REST API concepts, Git/GitHub, VS Code, debugging
Business & Operations Requirements documentation, workflow analysis, KPI thinking, customer operations, reporting, process improvement	Security-Aware Technology Linux, secure user setup, MFA guidance, troubleshooting, phishing awareness, incident-response foundations	Professional Delivery Technical writing, stakeholder communication, team coordination, Agile/Kanban exposure, research

SELECTED PROJECTS

Drive-Thru Order Intelligence Engine - AI/NLP Customer Request Parser

Python, Streamlit, rule-based NLP, fuzzy matching, JSON, Git/GitHub

GitHub: <https://github.com/chooksemmanuel/drive-thru-order-intelligence-engine>

- Built a browser-based prototype that converts messy customer speech-style orders into structured, POS-ready JSON.
- Designed rule-based and AI/NLP-style approaches to compare automation tradeoffs, fallback decisions, and clarification behavior.
- Handled typo-heavy inputs, French-English mixed orders, modifiers, corrections, delivery pickup flows, confidence scoring, and clarification questions.
- Added baseline evaluation across 10 sample orders, achieving 1.00 item detection, 1.00 side detection, 0.90 drink detection, and 1.00 clarification decision accuracy.

Lumiere - AI-Powered Skin Tone Analysis and Recommendation Web App

React, FastAPI, computer vision concepts, API integration, team delivery

- Collaborating on an AI-powered web application that analyzes uploaded facial images and returns skin-tone insights and makeup recommendations.
- Contributed to project planning, backend/frontend understanding, API flow review, model integration discussions, and user-facing product logic.

ShakespeareBot - Voice-Powered AI Chatbot

React, FastAPI, Python, NLP, scikit-learn

- Built an end-to-end AI chatbot concept with a React interface, FastAPI backend, and Python-based NLP model layer.
- Created a TF-IDF and Multinomial Naive Bayes text-classification workflow, achieving 95.35% cross-validated accuracy on a balanced Shakespeare text dataset.

AI Prompt Library & Productivity Toolkit

Prompt engineering, documentation, AI workflow design

- Created reusable prompt templates for research, documentation, technical explanations, and business-productivity workflows.
- Focused on helping non-technical users structure tasks, summarize information, and improve consistency in written deliverables.

Predictive Maintenance Alert System

Python, data analysis, regression-based modelling, reporting

- Used data to identify patterns and generate alert-style insights using regression-based modelling concepts.
- Practiced translating analytical outputs into operational recommendations and clear reporting for decision-making.

PROFESSIONAL EXPERIENCE

Technical Director / Research, Administration & Technology Contributor | Avane LLC - Remote, Nigeria/Canada | 2024 - Present

- Support planning, research, documentation, and cross-functional coordination for technology and startup initiatives.
- Translate technical and business needs into clearer project direction, written deliverables, requirements, risks, and practical next steps.

Founder & Operations Lead | Chooks Logistics - Calabar, Nigeria | Aug 2020 - May 2023

- Built and operated a customer-facing logistics business serving 350+ customers, strengthening experience in fulfillment, service operations, and customer communication.
- Managed unclear delivery instructions, timing expectations, issue resolution, service follow-up, and daily workflow coordination in a fast-moving environment.
- Used recurring request patterns and customer feedback to improve daily coordination, communication flow, and service reliability.

IT Support & Security Operations Contributor | Opportunity Desk - Remote, Nigeria/Canada | Sep 2024 - Dec 2025

- Provided remote support for account access, basic troubleshooting, secure user setup, MFA usage, and data-protection practices.
- Reviewed logs and user activity reports, documenting findings and practical follow-up recommendations in clear language.

Supply Care Assistant | Schoolhouse Playcare Centres of Durham - Durham Region, ON | Mar 2025 - Aug 2025

- Demonstrated reliability, communication, teamwork, and professionalism in a regulated childcare environment while adapting to changing operational needs.

EDUCATION

Applied Artificial Intelligence and Machine Learning Graduate Certificate | Jan 2026 - Present

Conestoga College, Waterloo, ON, Canada - Focus: machine learning, data analysis, AI systems, Python, model development, applied software, and project-based learning.

Cybersecurity Graduate Certificate | Jan 2025 - Aug 2025

Durham College, Oshawa, ON, Canada - Foundations in secure systems thinking, Linux, networking, incident response, troubleshooting, and technical documentation.

Bachelor of Science, Computer Science | Jan 2016 - Nov 2019

University of Calabar, Calabar, Nigeria - Foundation in programming, databases, systems, and software problem-solving.

CERTIFICATIONS & TRAINING

100 Days of Code: Python (Nov 2022 - Feb 2023) | Google Cybersecurity Certificate (Jun 2023) | EC-Council Certified Cybersecurity Technician (Jun 2024) | ALX AI Career Essentials (Oct 2024) | ALX Virtual Assistant Certificate (Nov 2024)
