PROFESSIONAL SUMMARY

Cybersecurity and IT support professional with a BSc in Computer Science and graduate training in Cybersecurity and Applied AI/ML. Experience supporting remote users, troubleshooting software issues, monitoring security activity, reviewing access events and documenting concerns. Security tooling exposure includes Splunk, Wireshark and OpenVAS. Seeking SOC, security analyst and incident response roles with a developing focus on digital forensics.

TECHNICAL SKILLS

Security Operations: Log review, security monitoring, initial incident triage, phishing indicators, access controls, MFA, incident documentation

Security Tools: Splunk, Wireshark, OpenVAS, Zabbix, Autopsy, FTK Imager (lab exposure)

Infrastructure: TCP/IP, Windows, Linux CLI, pfSense, OpenVPN, Windows Server / Active Directory concepts

Technical: Python, Git/GitHub, GitHub Actions, REST APIs, technical reports; NIST CSF and ISO 27001 concepts

PROFESSIONAL EXPERIENCE

Information Security Officer | IT Support & Security Operations

Opportunity Desk | Remote, Nigeria/Canada | Sep 2024 – Dec 2025

- Troubleshoot staff computer and software issues remotely; supported access, authentication and basic user troubleshooting.
- Monitored security-related activity, reviewed logs and user access events, and documented findings and items requiring follow-up.
- Maintained clear records of technical issues, investigations, resolutions and security considerations.

Technical Director | Research, Administration & Technology

Avane LLC | Remote, Nigeria/Canada | May 2024 – Sep 2026

- Coordinated technical planning, system requirements, security considerations and cross-functional issue follow-up.
- Prepared technical documentation and translated operational requirements into actionable tasks.

Cybersecurity Analyst Trainee

CWW Tech Africa | Remote | Jul 2024 – Aug 2024

- Performed hands-on OpenVAS vulnerability-assessment training and documented remediation recommendations in lab exercises.
- Led a six-person simulated security strategy project covering incident response and risk mitigation.

SELECTED PROJECTS

Aegis Africa | Python, Streamlit, GitHub Actions

- Built and deployed a rule-based suspicious-message and URL screening prototype using synthetic examples.
- Documented detection logic and limitations; maintained 13 automated tests with CI.

Security Infrastructure and Network Analysis Labs | Splunk, Wireshark, pfSense

- Practised packet inspection, VPN/firewall concepts and security monitoring.

Network Intrusion Detection Workshop | Python, scikit-learn

- Built a logistic regression notebook for network connection classification.

EDUCATION

Graduate Certificate, Applied Artificial Intelligence & Machine Learning

Conestoga College, Waterloo, ON | Aug 2026

Graduate Certificate, Cybersecurity

Durham College, Oshawa, ON | Aug 2025

BSc, Computer Science

University of Calabar, Nigeria | 2019

CERTIFICATIONS & TRAINING

EC-Council Certified Cybersecurity Technician (C|CT) | Google Cybersecurity Certificate | ALX AI Career Essentials | 100 Days of Code: Python
