PROFESSIONAL SUMMARY

Cybersecurity and IT support professional with a BSc in Computer Science and graduate training in Cybersecurity and Applied AI/ML. Experience troubleshooting staff software issues, monitoring security activity, reviewing access events and documenting findings. Completed a 30-day Windows endpoint forensic investigation involving evidence preservation, artifact analysis, memory forensics and reporting. Pursuing security operations, cyber analyst and junior incident response roles.

TECHNICAL SKILLS

Security Operations: Log review, security monitoring, initial incident triage, phishing indicators, access controls, MFA, incident documentation

Security & DFIR Tools: Splunk, Wireshark, OpenVAS, Zabbix; Autopsy, FTK Imager and Volatility 3 (hands-on lab)

Infrastructure: TCP/IP, Windows, Linux CLI, pfSense, OpenVPN, Windows Server / Active Directory concepts

Technical: Python, Git/GitHub, GitHub Actions, REST APIs, technical reports; NIST CSF and ISO 27001 concepts

PROFESSIONAL EXPERIENCE

Information Security Officer | IT Support & Security Operations

Opportunity Desk | Remote, Nigeria/Canada | Sep 2024 – Dec 2025

- Troubleshoot staff computer and software issues remotely; supported access, authentication and basic user troubleshooting.
- Monitored security-related activity, reviewed logs and user access events, and documented findings and items requiring follow-up.
- Maintained clear records of technical issues, investigations, resolutions and security considerations.

Technical Director | Research, Administration & Technology

Avane LLC | Remote, Nigeria/Canada | May 2024 – Sep 2026

- Coordinated technical planning, system requirements, security considerations and cross-functional issue follow-up.
- Prepared technical documentation and translated operational requirements into actionable tasks.

Cybersecurity Analyst Trainee

CWW Tech Africa | Remote | Jul 2024 – Aug 2024

- Performed hands-on OpenVAS vulnerability-assessment training and documented remediation recommendations in lab exercises.
- Led a six-person simulated security strategy project covering incident response and risk mitigation.

SELECTED PROJECTS

DFIR-CASE-001 | Windows Endpoint Forensics | Windows 11, Autopsy, FTK Imager, Volatility 3

- Completed a 30-day controlled Windows endpoint investigation; preserved USB, post-reboot memory and VMware evidence with SHA-256 integrity verification.
- Examined filesystem, browser and deleted-file artifacts; analyzed captured memory, correlated findings, reconstructed a timeline and completed a forensic report. github.com/chooksemmanuel/dfir-lab

Aegis Africa | Python, Streamlit, GitHub Actions

- Built a rule-based suspicious-message and URL screening prototype using synthetic examples; documented limitations and maintained 13 automated tests with CI.

Security Infrastructure Labs | Splunk, Wireshark, pfSense

- Practised packet inspection, firewall/VPN concepts and security monitoring in controlled labs.

EDUCATION

Graduate Certificate, Applied Artificial Intelligence & Machine Learning

Conestoga College, Waterloo, ON | Aug 2026

Graduate Certificate, Cybersecurity

Durham College, Oshawa, ON | Aug 2025

BSc, Computer Science

University of Calabar, Nigeria | 2019

CERTIFICATIONS & TRAINING

EC-Council C|CT | Google Cybersecurity Certificate | ALX AI Career Essentials | Python Training
